New water-soluble polypeptide(s) with affinity for IFN-alpha and beta - used to treat e.g. lupus erythematogus, Behcet's disease, aplastic anaemia, diabetes mellitus, rheumatoid arthritis, etc. Disclosure; page 47; 52pp; French.

The invention covers derivatives of the interferon-alpha and/or beta receptor obtained by deleting the transmembrane and cytoplasmic domains of the native receptor or by substitution. Potentially immunogenic epitopes are eliminated and the deriv. can be secreted from transformed cells. Soluble deriv.s block the activity of IFN alpha/beta and can be used to treat autoimmune diseases or to inhibit graft rejection. See also Q14239.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             this protein can be used for blocking the receptor when required, eg where overexpression of alpha-IFN is harmful. The Abs are also useful for eg drug targetting. Variants of the protein, having residue 164 (Thr) replaced by Arg and an Asp inserted between residues 479 and 480, are also useful. Sequence 557 AA;
                                                                                                                                                                                                                                                                                                                                                                                    Complete interferon-alpha/beta receptor.

PT Water soluble polyper and beta - useful as placed in the same water for the IFN-alpha and -beta content of the IFN-alpha and -beta conten
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     alignment_block:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               alignment_scores:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             seq_name:
      N-PSDB; Q30333.

Water soluble polypeptide(s) strongly bind interferon(s) alpha and beta - useful as immunosuppressants, for treating auto:immune of diseases and transplant rejection

Claim 3; Fig 2; 58pp; English.

DNA encoding the water-soluble polypeptide with a high affinity for IFN-alpha and -beta is isolated by PCR, using appropriate

Claim 3; Fig 2; 58pp; English.

DNA encoding the water-soluble polypeptide with a high affinity for IFN-alpha and -beta is isolated by PCR, using appropriate

claculation of the same way as primers and cloned cDNA as template. For example, bacteriophage lambda ZAP, containing the entire coding sequence of the IFN-alpha and -beta really (203053), was incubated with oligos the IFN-alpha and -R28496 represents the complete receptor. R28495 clacks the transmembrane and cytoplasmic domains. Both forms bind IFN in the same way as antibodies so are immunosuppressants e.g. for treating autolimmune diseases and graft rejection. They lack the toxic side-effects of known immunosuppressants such as steroids.

IFN-R; extracellular domain; monoclonal antibody; viral infection; cell proliferation; allograft rejection; systemic lupus erythematosus; psoriasis; multiple sclerosis; Behcet's Disease; aplastic anaemia; immunodeficiency; measles virus; interferon-alpha-beta.
                                                                                                                                                                                                                                                                                                                                                                                                                              Monoclonal antibody to human interferon type-I receptor - having neutralising activity against human type I interferon, used for therapy and diagnosis Disclosure; Fig 3; 21pp; English.

Monoclonal antibodies produced against soluble forms of the human interferon alpha-beta receptor based on the full-length human IFN-R sequence are claimed. The antibodies are useful for treatment and prophylaxis of disorders involving cell proliferation and/or viral
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       177
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       127

Compsn. of monoclonal antibodies against interferon receptor useful as immuno:modulator, eg. for treating AIDS Disclosure; Fig.3A-2B; 105pp; English.

The amino acid sequence of human interferon class I receptor is given in R73356. A recombinant soluble form of the extracellular domain of this receptor (R71723) has been used to raise immunomodulatory monoclonal antibodies.

Sequence 557 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       16-SEP-1994; E03114.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      New mammalian soluble interferon alpha-receptor forms - used for inhibiting, modulating or modifying the activities of interferon(s) bisclosure; Fig 7; 46pp; English.

Human transmembranal interferon alpha receptor (IFNAR) (W21804) includes a 21-amino acid transmembrane region. Novel, splice-deleted IFNAR forms 1 (W21805) and 2 (W21806) have been detected that lack this transmembrane domain. These, soluble non-membrane bound polypeptides can be expressed in host cells and used to inhibit, modulate or modify the activities of interferons alpha and beta in cells, tissues and organisms, or for diagnostic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       11-MAY-1995.

This invention describes a novel human breast cancer gene encoding a nuclear receptor-binding auxiliary protein, brx. The brx encoded protein has anti-cancer, anti-proliferative and mitogenic activity and acts as a transcription factor and tumour suppressor. Levels of expression of Brx can be detected using the primers, probes and antibodies (contained in the kit) to determine a predisposition to breast and ovarian cancer and other proliferative disorders of immune tissues. Vectors containing the Brx gene can be used for prevention and treatment of cancers and proliferative diseases of mammalian reproductive and immune tissues.

SC Claim 3; Page 86-92; 111pp; English.

This protein comprises a novel human 150 kDa cell surface metastasis-associated antigen, designated p150. It is the homologue of a novel murine p150 metastasis-associated antigen (see w31866). Its amino acid sequence was deduced from an isolated cDNA colone (see T93627). A claimed method for determining the metastatic potential of a tumour cell comprises assessing the level of p150 expression in the cell, a higher level of p150 expression in the cell, a higher level of p150 expression in the cell, a higher level of p150 expression in the cell, a higher interestion and consequently a higher metastatic potential. Immunogenic determinants of p150 and antibodies raised against them are useful in the diagnosis and treatment of metastatic potential in

Murine ETS2 repressor factor (ERF) (W07702) is a member of the ETS family and acts as a transcriptional repressor in mammalian cells. Its amino acid sequence was deduced from the murine ERF gene (T47198). Human ERF (see also W07700) has also been identified. ERF has tumour suppressor activity. Chimeric molecules comprising the ERF repressor domain in combination with a heterologous transcription factor having a binding domain can be used to reduce tumourigenicity associated with inappropriate expression of transcription factors.
                                                                                                                                                                                                                                                                                                                                                                                               383

                                                                They insulin receptor substrate polypeptide and corresp. nucleic acid receptors, antibodies etc., useful for diagnosis, treatment and receptors, antibodies etc., also for diagnosis, treatment and receptor substrate. Also for drug screening bisclosure; Page 47-33; 105pp; English.

Mouse insulin receptor substrate-2, or IRS-2 (R96994), is a substrate for the insulin receptor, interleukin-4 receptor and can be phosphorylated by these receptors. It contains a number of phosphorylated by these common with IRS-1, showing the 2 proteins to be related. IRS-2 can be obtd. e.g. by affinity purification from insulin-stimulated FDC-P2 cells using immobilized SH2 domains of p85, or can be obtd. e.g. by affinity purification from insulin-stimulated sequence (T28933). Cells or animals having the IRS-2 transgene can be used to study insulin-related disorders, e.g. type II can be used to study insulin-related disorders, e.g. type II can be used to study insulin-related disorders, e.g. type II can be used to study insulin-related disorders.
